# I. Introduction

Methodist Jennie Edmundson Hospital (MJE), an affiliate of Methodist Health System (MHS), has served the health and medical needs of southwestern Iowa since 1886. Here at Methodist Jennie Edmundson, we treat you as we would want member of our own families to be treated: with compassion and expertise based upon the latest proven measures of clinical quality.

## Mission Statement

Improving the health of our communities by the way we care, educate and innovate.

## Vision Statement

We will be the preferred integrated health system in the region.

## Values in Our Workplace – Cultural Competence

At Methodist Jennie Edmundson Hospital, all employees will behave in a way that is consistent with our core values. We intend to hold each other and ourselves mutually accountable for our actions. Demonstrating our values in the workplace means that we will respect a wide range of people both like and unlike ourselves. Our similarities and differences may include these characteristics: race, gender, class, native language, ethnic origin, physical ability, age, religion, sexual orientation, professional experience, personal preferences and work style.

We value our diversity. These similarities and differences will be affirmed and respected as we serve all of our customers, our patients, families and coworkers.

## Core Values

### Patient Centered

We are patient/customer centered, patient/customer-driven. Our patients are our first priorities. We listen, understand their needs and strive to exceed their expectations.

### Respect

We honor and respect the dignity of all. We say what we mean and mean what we say. We require fair, honest and ethical behavior in every activity and under all circumstances.

### Excellence

We strive for excellence and push beyond. We strive for the highest standards and push beyond. We continuously improve performance through knowledge, experience, innovation and risk-taking.

### Teamwork

We work as one. People are our most important resource. We demonstrate respect and concern for everyone, value each individual as an equal team member and support professional growth and autonomy.

### Community Service

We are dedicated to serving our community. We strive to achieve a healthy balance between enhancing the welfare of our community and sustaining our economic growth.

## II. Our Commitment

From the day Methodist Jennie Edmundson Hospital started in 1886, service has been a top priority. Financial assistance, health education, outreach to under-resourced populations – these and other community activities have been central to our mission. Our goal has always been to address and improve the overall health of the community.

Our community benefit programs are strategically focused to accomplish the following objectives:

- Improve access to health care services.
- Enhance the health of the community.
- Advance medical or health care knowledge.
- Relieve or reduce the burden of government or other community efforts.

## III. 2021 Community Health Needs Assessment

Methodist Jennie Edmundson Hospital conducted a needs assessment with numerous community partners including Douglas County Health Department, Pottawattamie County Public Health Department/VNA, Sarpy/Cass County Department of Health and Wellness, Live Well Omaha, Nebraska Medicine and CHI Health and federally-qualified health centers.

The assessment was conducted by Professional Research Consultants, Inc. (PRC). PRC is a nationally-recognized health care consulting firm with extensive experience conducting Community Health Needs Assessments in hundreds of communities across the United States since 1994.

### Methodology

To ensure the best representation of the population surveyed, a telephone interview methodology — one that incorporates both landline and cell phone interviews — was employed. The primary advantages of telephone interviewing are timeliness, efficiency, and random-selection capabilities.

The sample design used for this effort consisted of a stratified random sample of 2,854 individuals aged 18 and older in the Metro Area, including 1,451 in Douglas County (NE); 702 in Sarpy Count (NE); 200 in Cass County (NE); and 501 in Pottawattamie County (IA). Once the interviews were completed, these were weighted in proportion to the actual population distribution so as to appropriately represent the Metro Area as a whole. All administration of the surveys, data collection, and data analysis was conducted by PRC.

To solicit input from key informants, those individuals who have a broad interest in the health of the community, an Online Key Informant Survey was also implemented as part of this process. This included physicians, public health representatives, other health professionals, social service providers, business leaders and a variety of other community leaders. Potential participants were chosen because of their ability to identify primary concerns of the populations with whom they work, as well as of the community overall. Key informants were contacted by email, introducing the purpose of the survey

and providing a link to take the survey online. In all 150 community stakeholders took part in the Online Key Informant Survey.

The following are the areas of opportunity identified through this assessment:

- **Access to Healthcare Services**
- **Cancer**
- **Diabetes**
- **Heart Disease & Stroke**
- **Infant Health & Family Planning**
- **Injury & Violence**
- **Mental Health**
- **Nutrition, Physical Activity & Weight**
- **Oral Health**
- **Potentially Disabling Diseases**
- **Respiratory Diseases**
- **Sexual Health**
- **Social Determinants of Health**
- **Substance Abuse**
- **Tobacco Use**

The full Community Health Needs Assessment along with this FY 2021 – FY 2023 Implementation Strategy can be accessed through Methodist Health System’s Community Benefits website: <https://bestcare.org/about/community-benefits/our-plan>.

## **IV. Implementation Strategy Plan**

Findings from Methodist Jennie Edmundson Hospital’s Community Health Needs Assessment were initially reviewed by the Board of Directors in October of 2021. Strategies, goals and methods of evaluation were developed to create the FY 2021 – FY 2023 Implementation Strategy for Needs Identified in the Community Health Needs Assessment.

This plan lists some of the local area community partners of which MJE will collaborate on opportunities that would be consistent with their expertise. As our work progresses, we will identify and partner with new organizations as necessary. This strategy clearly identifies opportunities where MJE lacks expertise to make a meaningful impact. MJE will continually monitor these opportunities and collaborate with community organizations that are addressing these needs and as funding and/or expertise are made available, MJE will respond accordingly.

At the time that this plan is required to be completed, Pottawattamie County has a collaborative effort ongoing to set priorities for the County’s health needs. Because the County’s priorities will be established after the finalization of this plan, MJE anticipates some fluidity will be needed in the future to align with the County.

## Strategy Execution and Anticipated Impact

Evaluation of impact will be measured by a subsequent CHNA conducted at the end of this planning horizon. Impact will be compared to current results and influenced by the Healthy People 2030 guidelines and recommendations, among other local, state and national benchmarks.

## Prioritization

The Board of Directors of Methodist Jennie Edmundson Hospital has determined that the following opportunities identified in the 2021 CHNA should be addressed through these strategies and approved the 2021 – 2023 Implementation Strategy Plan on February 23, 2022.

- **Priority I** – MJE has significant resources to improve these health needs in the community: *“Leaders in the Community”*
- **Priority II** – MJE has limited resources to improve these health needs in the community, and will defer to other organizations but collaborate where and when appropriate: *“Partners in the Community”*
- **Priority III** – MJE has minimal resources to improve these health needs in the community. MJE does not intend to specifically address these needs, MJE will participate with other community organizations currently addressing these needs: *“Participants in the Community”*

### Priority I:

- Access to Health Services
- Cancer
- Heart Disease & Stroke
- Infant Health & Family Planning
- Mental Health

### Priority II:

- Diabetes
- Nutrition, Physical Activity & Weight
- Respiratory Diseases
- Social Determinants of Health (SDOH)

### Priority III:

- Injury & Violence
- Oral Health
- Potentially Disabling Conditions
- Sexual Health
- Substance Abuse
- Tobacco Use

**Identified as Priority I: “Leaders in the Community”**

Identified Need:	Description:	Strategies:	Method of Evaluation:
<b>Access to Health Services</b>	9.1% of Pott. County residents reported having used the a Hospital Emergency Room More than Once in the Past Year	<ul style="list-style-type: none"> <li>• Improve, expand and support access to health care services in Pottawattamie County and Western Iowa through primary care, urgent care, extended hours and e-visits.</li> <li>• Ensure the populations served through community outreach and <u>Caring for our Communities</u> (CFOC) will have information on services, resources and appropriate referrals available in their communities.</li> <li>• Utilize MPC health coaches as well as <u>CFOC</u> health workers to engage patients.</li> <li>• Support access to medical care for the uninsured/underinsured and minority populations through <u>All Care Health Center</u>, a federally-qualified health clinic.</li> <li>• Ensure appropriate access and decrease utilization of high-acuity resources by use of community coaches and community health workers through <u>Connections Agency on Aging</u> and <u>Heartland Family Services</u>.</li> <li>• Collaborate with existing &amp; new partners to bring the Mobile Mammography and Mobile Diabetes Units to our communities.</li> <li>• Provide all eligible patients a financial assistance program which is designed to serve those in financial need with fairness, consistency and compassion.</li> <li>• Provide clinical rotations, internships and experiences for medical and allied health students across Iowa education institutions.</li> </ul>	Decrease the % of One or More ER Visits in the Past Year  <u>Comparison:</u> 2018: 6.8%

<p><b>Cancer</b></p>	<p>Age-Adjusted Death Rate for Cancer is 170.5* in Pott. County (per 100,000 population) which is significantly worse than the National Average</p> <p><i>*2017-2019 average annual data</i></p>	<ul style="list-style-type: none"> <li>• The COC accredited MJE Cancer Center will offer &amp; enhance multidisciplinary care and an array of services for cancer patients.</li> <li>• MJE Cancer Center has received multiple awards including: COC Outstanding Achievement Award, National Accreditation for Breast Centers, American College of Radiology Accreditation for Radiation Oncology and Center of Excellence for Lung Cancer Screening.</li> <li>• Enhance and grow Cancer screenings offered to high-need populations in the community with a focus on the early identification oral, head &amp; neck, skin, lung, and breast (Mobile Mammography Unit) cancers.</li> <li>• Identify lung cancer earlier through increased CT screenings of high-risk patients and the utilization of an incidental nodule program.</li> <li>• Identify women with a high-risk of developing cancer through a comprehensive high-risk assessment breast program.</li> <li>• Provide screening and reminders for different types of cancers and behavioral risk education at community events.</li> <li>• Encourage utilization of a <u>Smoking Cessation Counselor</u> and <u>Quitline Iowa</u> and assist in referrals for those seeking help with smoking cessation and nicotine replacement therapy.</li> </ul>	<p>Decrease the Age-Adjusted Death Rate in Cancer</p> <p><u>Comparison:</u> National Average: 149.3*</p>

<p><b>Heart Disease &amp; Stroke</b></p>	<p>Age-Adjusted Death Rate for Heart Disease is 170.7* in Pottawattamie County (per 100,000 population) which is significantly worse than the National Average</p> <p>Age-Adjusted Death Rate for Stroke is 32.4* in Pottawattamie County (per 100,000 population)</p> <p>Pott County in 2018 = 39.9</p> <p><i>*2017-2019 average annual data</i></p>	<ul style="list-style-type: none"> <li>• The Chest Pain &amp; Stroke certified MJE cardiac &amp; vascular center now includes a cardiac catheterization lab, a noninvasive diagnostic lab, a heart failure program, cardiac rehab and inpatient care.</li> <li>• Participate in the <u>Statewide STEMI Task Force</u> to enhance systems of care and care delivery.</li> <li>• Participate in <u>Mission: Lifeline</u> to share best practices, provide education and increase public awareness of the role of EMS in the care of heart attack victims. Build a sustainable framework ensuring high quality care in a timely manner.</li> <li>• Utilize high risk health coaches in MPC cardiology clinics to engage patients, coordinate care and improve outcomes for heart failure and respiratory patients.</li> <li>• Offer ongoing education to referring providers, nursing staff, EMS, and community critical access hospitals.</li> <li>• Promote “return to screening” for high blood pressure and risk factors for heart disease and stroke.</li> </ul>	<p>Decrease the Age-Adjusted Death Rates for Heart Disease and Stroke</p> <p><u>Comparison:</u> Heart Disease National Average: 165.0*</p> <p>Stroke National Average: 37.2*</p>
<p><b>Infant Health &amp; Family Planning</b></p>	<p>Average annual infant death rate is 7.9* (per 1,000 live births) in Pott. County</p> <p><i>*Most recent data available, 2017 - 2019</i></p>	<ul style="list-style-type: none"> <li>• Become MHS’s hub for mother-baby services in Western Iowa, focusing on maternal-fetal medicine and neonatal care.</li> <li>• Serve as a milk depot for breast milk donations in partnership with <u>Mother’s Milk Bank of Iowa</u>.</li> <li>• Open a breast pump boutique onsite that offer patients equipment and supplies.</li> <li>• Provide information to new mothers on how to properly breastfeed and assist with lactation services for these patients.</li> <li>• Per certification, educate new families on safe sleep practices, abusive head trauma and car seat safety as part of standard discharge process.</li> </ul>	<p>Decrease the average annual Infant Death rate</p> <p><u>Comparison:</u> 2014 – 2016: 7.6<sup>+</sup></p> <p><i>+Most recent comparison data available</i></p>

<p><b>Mental Health</b></p>	<p>18.2% of Pott. County residents report having Fair/Poor mental health</p>	<ul style="list-style-type: none"> <li>• Provide access to behavioral health care through the MJE’s inpatient behavioral health unit.</li> <li>• Utilize community outreach coordinators whose goal is to promote mental health resources as well as education on how to notice signs &amp; symptoms of behavioral health issues.</li> <li>• Lead efforts to enhance efforts of <u>CFOC</u> behavioral health coaches and <u>Southwest Iowa Region Mental Health and Disability Services (MHDS)</u> to connect individuals with community services.</li> <li>• Collaborate with other members of the <u>CFOC</u> to increase access to the behavioral health resources and decrease utilization of high-acuity services.</li> <li>• Coordinate efforts with mental health professionals, advocates, and partners to promote resources for treatment and support using social media, campaigns and networking.</li> <li>• Visit Pottawattamie County schools and guidance counselors to provide education and resources.</li> <li>• Research, collaborate and promote best practices with regard to evaluating and questioning individuals in emergency departments, clinics, and schools to guide the process for getting appropriate help in advance.</li> </ul>	<p>Decrease the % of Pott. County Residents Reporting "Fair/Poor" Mental Health</p> <p><u>Comparison:</u> 2018: 9.4%</p>
-----------------------------	--	---	--

**Identified as Priority II: “Partners in the Community”**

Identified Need:	Description:	Strategies:	Method of Evaluation:
<b>Diabetes</b>	<p>Age-Adjusted Death Rate for Diabetes in Pott. County are higher than the national average, at 23.4* (per 100,000 population)</p> <p><i>*Most recent data available, average annual 2017 - 2019</i></p>	<ul style="list-style-type: none"> <li>• With MPC health coaches and dieticians, follow-up, monitor, address any barriers, and improve outcomes of diabetic patients.</li> <li>• Integrate MJE’s outpatient diabetes self-management education program and MPC’s health coaches for continuity of care.</li> <li>• Increase community outreach and include information on diabetes management and prevention (Mobile Diabetes Unit).</li> <li>• Participate in community events and offer free blood sugars screenings.</li> <li>• Partner with <u>Juvenile Diabetes Research Fund</u> to provide resources.</li> <li>• Partner with <u>Live On Nebraska</u> for birth tissue donations to replace damaged skin related to diabetes and other health issues.</li> </ul>	<p>Decrease the Diabetes Age-Adjusted Death Rate</p> <p><u>Comparison:</u> National Average: 21.5*</p>
<b>Nutrition, Physical Activity and Weight Status</b>	<p>77.5% of the Pott. County residents report being Overweight (BMI 25+)</p>	<ul style="list-style-type: none"> <li>• Increase community outreach and include information on diet, nutrition, exercise and weight management.</li> <li>• Provide screened individuals, with BMI greater than 25, education, resources, and referrals for intervention.</li> <li>• Work with community partners to increase healthy food alternatives in the area through community gardens and food pantries.</li> <li>• Partner with schools to provide healthy cooking lessons provided by MHS food services.</li> </ul>	<p>Decrease the % of Pott. County residents reporting being Overweight</p> <p><u>Comparison:</u> 2018: 72.4%</p>

<b>Respiratory Diseases</b>	<p>Age-Adjusted Death Rates for Chronic Lung and Respiratory Diseases (CLRD) and Pneumonia/Influenza in Pott. County are 60.0* and 17.3*, respectively (per 100,000 population) which are significantly worse than the National Averages</p> <p><i>*Most recent data available, average annual 2017 - 2019</i></p>	<ul style="list-style-type: none"> <li>• Through the Pulmonology Physician offices, collaborate with community organizations currently addressing this need (<u>American Lung Association</u>).</li> <li>• Continue to promote Pulmonary Rehab availability.</li> <li>• Incorporate High Risk Health Coaches (RN's) in MPC Pulmonology Specialty Clinics to coordinate care.</li> <li>• Encourage utilization of <u>Smoking Cessation Counselor</u> and <u>Quitline Iowa</u> and assist in referrals.</li> <li>• Provide annual influenza vaccines to community partners such as the <u>All Care Health Center</u>.</li> </ul>	<p>Decrease the Age-Adjusted Death Rate for Respiratory Diseases</p> <p><u>Comparison:</u> CLRD: 39.6<sup>+</sup></p> <p>Pneumonia and Influenza: 13.8<sup>+</sup></p> <p><sup>+</sup>2014 - 2016 data</p>
<b>Social Determinants of Health (SDOH)</b>	<p>5.8% of Pott. County residents reported having Unhealthy or Unsafe Housing Conditions in the Past Year</p>	<ul style="list-style-type: none"> <li>• Partner with <u>CFOC</u> to address social determinants that affect individuals in our communities.</li> <li>• Establish a system-wide SDOH Council involving representatives from across the System.</li> <li>• Partner with <u>Bridges Out of Poverty</u> program and make available to staff and community.</li> <li>• Serve on a medical respite oversight body for the homeless and frequent medical care utilizers.</li> <li>• Partner with local <u>first responders</u>, <u>law enforcement</u> and <u>EMS</u> personnel to address social determinants of health before hospital admissions.</li> <li>• Pilot and implement a social needs screening and referral program to address various SDOH patients may have.</li> </ul>	<p>Decrease % of Pott. County residents reporting having Unhealthy or Unsafe Housing Conditions</p> <p><u>Comparison:</u> 2018: 2.6%</p>

### Identified as Priority III: “Participants in the Community”

Identified Need:	Description:	Strategies:	Method of Evaluation:
<b>Injury and Violence</b>	40.4% of the Key Informants perceive that Injury & Violence is a Major Problem in our community	<ul style="list-style-type: none"> <li>• Participate with <u>law enforcement</u> &amp; the <u>City of Council Bluffs</u>.</li> <li>• Participate in the <u>Southwest Iowa Coalition on Human Trafficking</u>.</li> <li>• Partner with <u>law enforcement</u> to offer the Sexual Assault Nurse Examiner/Sexual Assault Response Team (SANE/SART) for treatment, evidence collection, and follow-up referrals for survivors.</li> <li>• Participate in the <u>Shaken Baby Syndrome Task Force</u>.</li> </ul>	Decrease the % of Key Informants Perceiving that Injury & Violence is a Major Problem in our community.  <u>Comparison:</u> 2018: 45.1%
<b>Oral Health</b>	73.3% of Key Informants perceived Oral Health as a major or moderate problem across the metro area	<ul style="list-style-type: none"> <li>• Offer prevention-based strategies and screenings to the broader community for HPV, a root cause of oropharyngeal cancers.</li> </ul>	Decrease the % of Key Informants reporting Oral Health as a Major Problem  <u>Comparison:</u> 2018: 68.0%
<b>Potentially Disabling Conditions</b>	28.1% of Pott. County adults report being limited in activities in some way due to a physical, mental or emotional problem	<ul style="list-style-type: none"> <li>• Collaborate with the <u>Alzheimer’s Association</u>, <u>Connections Area Agency on Aging</u>, and <u>memory care providers</u> in the community.</li> <li>• Increase preventive care screenings and education.</li> <li>• Continue to enhance and improve fall prevention strategies for hospital patients and ensure spaces are safe.</li> </ul>	Decrease the % of residents reporting limited activity  <u>Comparison:</u> 2018: 20.5%

<b>Sexual Health</b>	<p>Sexually Transmitted Diseases (Gonorrhea and Chlamydia) are notably higher than the national incidence rate, at 336.2* and 545.0*, respectively (per 100,000 population)</p> <p><i>*Most recent data available, 2018</i></p>	<ul style="list-style-type: none"> <li>• Participate with the <u>Pottawattamie County Health Department</u> and other health partners to provide education and resources for intervention.</li> <li>• Promote healthy sexual behaviors, strengthen community awareness, and increase access to quality services to prevent sexually transmitted diseases (STDs).</li> </ul>	<p>Decrease incidence of sexually transmitted diseases</p> <p><u>Comparison:</u> Gonorrhea 2014+: 96.0</p> <p>Chlamydia Incidence 2014+: 460.5</p> <p><i>+Most recent comparison data available</i></p>
<b>Substance Abuse</b>	<p>50.0% of Key Informants perceived Substance Abuse as a Major Problem in our community</p>	<ul style="list-style-type: none"> <li>• Enhance the opioid stewardship program throughout the hospital, physician offices, and pharmacies.</li> </ul>	<p>Decrease the % of Key Informants Perceiving that Substance Abuse is a Major Problem in our community.</p> <p><u>Comparison:</u> 2018: 57.9%</p>
<b>Tobacco Use</b>	<p>81.9% of Key Informants perceived Substance Abuse as a Major or Moderate Problem in our community</p>	<ul style="list-style-type: none"> <li>• Encourage utilization of a <u>Smoking Cessation Counselor</u> and <u>Quitline Iowa</u> and assist in referrals for those seeking help with smoking cessation and nicotine replacement therapy.</li> </ul>	<p>Decrease the % of Key Informants Perceiving that Tobacco Use is a Major Problem in our community.</p> <p>2018: 70.2%</p>
