I. Introduction

Methodist Women's Hospital (a clinical entity of Methodist Health System) cares for Nebraska's newest families and is committed to superior service and a deep understanding of patient care and creating better outcomes for our diverse communities.

Mission Statement

Improving the health of our communities by the way we care, educate and innovate.

Vision Statement

We will be the preferred integrated health system in the region.

Values in Our Workplace – Cultural Competence

At Methodist Women's Hospital, all employees will behave in a way that is consistent with our core values. We intend to hold each other and ourselves mutually accountable for our actions. Demonstrating our values in the workplace means that we will respect a wide range of people both like and unlike ourselves. Our similarities and differences may include these characteristics: race, gender, class, native language, ethnic origin, physical ability, age, religion, sexual orientation, professional experience, personal preferences and work style. We value our diversity. These similarities and differences will be affirmed and respected as we serve all of our customers, our patients, families and coworkers.

Core Values

Patient Centered

We are patient/customer centered, patient/customer-driven. Our patients are our first priorities. We listen, understand their needs and strive to exceed their expectations.

Respect

We honor and respect the dignity of all. We say what we mean and mean what we say. We require fair, honest and ethical behavior in every activity and under all circumstances.

Excellence

We strive for excellence and push beyond. We strive for the highest standards and push beyond. We continuously improve performance through knowledge, experience, innovation and risk-taking.

Teamwork

We work as one. People are our most important resource. We demonstrate respect and concern for everyone, value each individual as an equal team member and support professional growth and autonomy.

Community Service

We are dedicated to serving our community. We strive to achieve a healthy balance between enhancing the welfare of our community and sustaining our economic growth.

II. Our Commitment

From the day the original Methodist Women’s Hospital opened its doors in 2011, service and commitment to our community has been the top priority. Financial assistance, health education, outreach to under-resourced populations – these and other community benefit activities have always been central to our mission. Our goal has always been to address and improve the overall health of the community.

Our community benefit programs are strategically focused to accomplish the following objectives:

- Improve access to health care services.
- Enhance the health of the community.
- Advance medical or health care knowledge.
- Relieve or reduce the burden of government or other community efforts.

III. 2021 Community Health Needs Assessment Summary

Methodist Women’s Hospital conducted a needs assessment with numerous community partners including Douglas County Health Department, Pottawattamie County Public Health Department, Sarpy/Cass County Department of Health, Nebraska Medicine/University of Nebraska Medical Center, CHI Health, along with other community nonprofit organizations and federally-qualified health centers.

The assessment was conducted by Professional Research Consultants, Inc. (PRC). PRC is a nationally-recognized health care consulting firm with extensive experience conducting Community Health Needs Assessments such as this in hundreds of communities across the United States since 1994.

Methodology

To ensure the best representation of the population surveyed, a telephone interview methodology — one that incorporates both landline and cell phone interviews — was employed. The primary advantages of telephone interviewing are timeliness, efficiency, and random-selection capabilities.

The sample design used for this effort consisted of a stratified random sample of 2,854 individuals aged 18 and older in the Metro Area, including 1,451 in Douglas County (NE); 702 in Sarpy Count (NE); 200 in Cass County (NE); and 501 in Pottawattamie County (IA). Once the interviews were completed, these were weighted in proportion to the actual population distribution so as to appropriately represent the Metro Area as a whole. All administration of the surveys, data collection, and data analysis was conducted by PRC.

To solicit input from key informants, those individuals who have a broad interest in the health of the community, an Online Key Informant Survey was also implemented as part of this process. This included physicians, public health representatives, other health professionals, social service providers, business leaders and a variety of other community leaders. Potential participants were chosen because of their ability to identify primary concerns of the populations with whom they work, as well as of the community overall. Key informants were contacted by email, introducing the purpose of the survey

and providing a link to take the survey online. In all 150 community stakeholders took part in the Online Key Informant Survey.

The following are the areas of opportunity identified through this assessment:

- Access to Healthcare Services
- Cancer
- Diabetes
- Heart Disease & Stroke
- Infant Health & Family Planning
- Injury & Violence
- Mental Health
- Nutrition, Physical Activity & Weight
- Oral Health
- Potentially Disabling Diseases
- Respiratory Diseases
- Sexual Health
- Social Determinants of Health
- Substance Abuse
- Tobacco Use

The full Community Health Needs Assessment along with this FY 2021 – FY 2023 Implementation Strategy can be accessed through Methodist Health System’s Community Benefits website: <https://bestcare.org/about/community-benefits/our-plan>.

IV. Implementation Strategy Plan

Findings from Methodist Women’s Hospital’s Community Health Needs Assessment were initially reviewed by the Board of Directors in October of 2021. Strategies, goals and methods of evaluation were developed to create the FY 2021 – FY 2023 Implementation Strategy For Needs Identified in the Community Health Needs Assessment.

This strategy lists some of the local area community partners of which MWH will collaborate on opportunities that would be consistent with their expertise. As our work progresses, we will identify and partner with new organizations and key individuals as necessary.

This document clearly identifies opportunities where MWH lacks internal competencies to make a meaningful impact. MWH will continually monitor these opportunities and collaborate with community organizations that are addressing these needs and as funding and/or expertise are made available, MWH will respond accordingly.

Strategy Execution and Anticipated Impact

Evaluation of impact will be ongoing, as well as measured by a subsequent CHNA conducted at the end of this planning horizon. Impact will be compared to current results and influenced by the Healthy People 2030 guidelines and recommendations, among other locally- and nationally-recognized benchmarks.

Prioritization

The Board of Directors of Methodist Hospital has determined that the following opportunities identified in the 2021 CHNA should be addressed through these strategies and approved the 2021 – 2023 Implementation Strategy Plan on February 24, 2022.

- **Priority I** – *Identified as the opportunities which MWH has significant expertise to help improve health rates in the community: “Leaders in the Community”*
- **Priority II** – *Identified as the opportunities MWH has limited expertise to help increase health rates in the community, and will defer to other organizations but assist where and when appropriate: “Partners in the Community”*
- **Priority III** – *Identified as opportunities MWH has minimal expertise to help increase health rates in the community. MWH does not intend to specifically address these opportunities, primarily due to lack of expertise and to the involvement of other organizations. MWH will continue to collaborate with other community organizations currently addressing these opportunities: “Participants in the Community”*

Priority I:

- Access to Healthcare Services
- Infant Health & Family Planning
- Sexual Health

Priority II:

- Cancer
- Diabetes
- Heart Disease & Stroke
- Injury & Violence
- Mental Health
- Nutrition, Physical Activity & Weight
- Social Determinants of Health

Priority III:

- Oral Health
- Potentially Disabling Conditions
- Respiratory Disease
- Substance Abuse
- Tobacco Use

Identified as Priority I: “Leaders in the Community”

Identified Need:	Description:	Strategies:	Method of Evaluation:
<p>Access to Health Services</p>	<p>6.9% of Omaha Metro Area residents reported having One or More ER Visits in the Past Year</p>	<ul style="list-style-type: none"> • As a specialty hospital, access is focused on women’s health, obstetrics, and neonatal care. More babies are delivered, and the NICU treats more babies, than any other hospital in the region. • Provide access to emergency services for men, women and children. • Offer access to specialized perinatal care with the area's largest maternal-fetal medicine group. • Collaborate with rural hospitals and clinics to provide prenatal and perinatal health consultation and education. • Engage residents to better utilize women’s health services offered by Methodist Community Health Clinic (MCHC), the Douglas County Public Health Department, Charles Drew Health Center, One World Community Health Center. • Provide all eligible patients a financial assistance program which is designed to serve those in financial need with fairness, consistency and compassion. • Provide clinical rotations, internships and experiences for medical and allied health students across Iowa education institutions. 	<p>Reduce the % of residents reporting having One or More ER Visits in the Past Year</p> <p>Comparison: 2018: 6.4%</p>

<p>Infant Health & Family Planning</p>	<p>Infant mortality for the Metro Area is 5.8 per 1,000 Live Births*</p> <p>Teen Birth Rate for the Metro Area is 22.4 per 1,000 Females⁺</p> <p><i>*2017 – 2019 Average</i></p> <p><i>⁺15-19 year-old Females, 2012-2018</i></p>	<ul style="list-style-type: none"> • Provide care in the NICU for newborn infants with extreme prematurity, critical illness or surgical needs. • Utilize HeRO monitoring in all NICU rooms to track the beat-to-beat variability of heartbeats, giving advanced warning of infection, illness or other distress – before other symptoms appear. Studies show that HeRO can reduce infant mortality by more than 20%. • Offer classes on pregnancy, childbirth, parenting, and taking care of infants. Be committed to helping families transition into the next phases in their lives. • Provide lactation consults and promote support groups/back to work classes for breastfeeding mothers to support healthier babies. • Serve as a milk depot for breast milk donations at MWH in partnership with Mother’s Milk Bank of Iowa. • Make midwifery care available throughout the pregnancy to ensure a personalized birth experience while offering safe and comfortable options to women and their families. • Enroll high-risk newborns in the TIPS developmental program and provide specialized care and resources depending on needs. • Offer genetic testing and counseling in partnership with <u>Gene Matters</u> to NICU patients and community members. • Provide adolescent gynecology services, treatment, and counseling focused on family planning and other health conditions in a teen-friendly environment. 	<p>Reduce Infant Mortality per 1,000 Live Births</p> <p><u>Comparison:</u> Healthy People 2030: ≤5.0 (per 1,000 Live Births)</p> <p>Reduce Teen Birth Rate per 1,000 Females</p> <p><u>Comparison:</u> Healthy People 2030: ≤31.4 (per 1,000 Females aged 15-19)</p>
---	---	--	--

<p>Sexual Health</p>	<p>Gonorrhea incidence per 100,000 in the Metro Area is 245.4*</p> <p>Chlamydia incidence per 100,000 in the Metro area is 562.8*</p> <p><i>*2018, Most recent data available</i></p>	<ul style="list-style-type: none"> • In collaboration with Douglas County Health Department and other health partners, provide education and resources for intervention to all appropriate participants screened. • Through MPC’s Sexual Health Clinic, address problems related to sexual health. • Offer a complete range of assessment, treatment and therapy options, including sex therapy and counseling, diagnostic testing, medication management, and emotional support and counseling. • Promote healthy sexual behaviors and strengthen community capacity to prevent sexually transmitted diseases and their complications. • Partner with Get Access Granted to offer free and confidential STD Testing at Women’s Hospital as well as education and prevention techniques. • Through the SANE/SART program, coordinate treatment of sexually transmitted diseases for survivors of sexual assault at MCHC. 	<p>Reduce incidence of Sexually Transmitted Diseases</p> <p><u>Comparison:</u> Gonorrhea 2014⁺: 138.7</p> <p>Chlamydia 2014⁺: 535.1</p> <p><i>⁺Most recent comparison data available</i></p>
-----------------------------	---	--	---

Identified as Priority II: “Partners in the Community”

Identified Need:	Description:	Strategies:	Method of Evaluation:
Cancer	<p>Cancer Age-Adjusted Mortality (per 100,000 population) is 155.5* for the Metro Area</p> <p><i>*Based on 2017-2019 annual average deaths per 100,000 population</i></p>	<ul style="list-style-type: none"> • Provide screening recommendations for different types of cancers and behavioral risk education at community events and health fairs. • Partner with local employers and community clinics to increase the number of women being screened for breast cancer with the Mobile Mammography Unit. • Increase HPV vaccination rates and awareness of its association to cancer with the <u>American Cancer Society’s</u> grant programs and education initiatives. • Partner with the <u>Nebraska Coalition on Cancer, The American Cancer Society, Susan G. Komen Great Plains, and Great Plains Colon Cancer Task Force</u> on education, screening and prevention programs across the metro. • Enhance services from the MECC breast center at the Women’s Hospital. 	<p>Reduce the Cancer Age-Adjusted Death Rate</p> <p><u>Comparison:</u> National Average: 149.3*</p>
Diabetes	<p>12.4% of Omaha Metro Area residents report having diabetes</p>	<ul style="list-style-type: none"> • With MPC health coaches and dieticians, follow-up, monitor, address any barriers, and improve outcomes of diabetic patients. • Increase access to care and education for diabetic patients through MPC sites as well as telehealth and mobile capabilities. • Partner with <u>Live On Nebraska</u> for birth tissue donations to replace damaged skin related to diabetes and other health ailments. • Offer gestational diabetes care and prevention tips through telehealth and in-person consultations. 	<p>Decrease the % of residents reporting having Diabetes</p> <p><u>Comparison:</u> 2018: 11.2%</p>

Heart Disease & Stroke	<p>6.0% of Omaha Metro Area residents report having Heart Disease</p> <p>3.2% of Omaha Metro Area residents report having had a stroke</p>	<ul style="list-style-type: none"> • Develop and distribute information/education at community events on symptoms of heart attacks and stroke for women. • Utilize high risk health coaches in MPC cardiology clinics to engage women, coordinate care and improve outcomes for heart disease and stroke patients. 	<p>Decrease the % of residents reporting having Heart Disease and Stroke</p> <p><u>Comparison:</u> Heart Disease 2018: 4.7%</p> <p>Stroke 2018: 2.4%</p>
Injury and Violence	<p>404%. of the Key Informants perceive that Injury & Violence is a Major Problem in our community.</p>	<ul style="list-style-type: none"> • Partner with <u>law enforcement</u> to offer the Sexual Assault Nurse Examiner/Sexual Assault Response Team (SANE/SART) for treatment, evidence collection, and follow-up referrals for survivors. This program has been established in the metro-area as best practice. • Advocate for state and local policies which contribute to stopping sexual assault and sex trafficking. • Provide infant car seat education and awareness programs to parent(s) of newborns. • Participate in Pediatric Abuse Head Trauma (formerly known as Shaken Baby Syndrome) Task Force to address root causes. 	<p>Decrease the % of key informants perceiving that Injury & Violence is a major problem in our community.</p> <p>Key Informants, 2018: 45.1%</p>
Mental Health	<p>85.1% of Key Informants perceive depression as a major problem.</p>	<ul style="list-style-type: none"> • Screen women before discharge following deliveries and, if indicated for post-partum depression, refer them to a social worker for counseling referrals. 	<p>Decrease the % reporting major depression</p> <p><u>Comparison:</u> Key Informants, 2018: 79.1%</p>

Nutrition, Physical Activity and Weight	71.9% of Metro-area residents report being overweight (BMI 25+)	<ul style="list-style-type: none"> • Provide lactation consultations • Promote support groups and back to work classes for breastfeeding mothers to support healthier babies. • Regularly screen children for weight status and offer interventions to achieve healthy weights in primary care offices. • Serve as a milk depot for breast milk donations at MWH in partnership with <u>Mother’s Milk Bank of Iowa</u>. 	Decrease the % of residents reporting being Overweight <u>Comparison:</u> Overweight, 2018: 70.7%
Social Determinants of Health	Reduce overall Vizient Vulnerability Index score across all SDOH areas	<ul style="list-style-type: none"> • Partner with Vizient to identify gaps and develop strategies which address SDOH and health equity. • Find Help (aka Aunt Bertha or Community Relay) and UniteUS social referral platforms are being tested & piloted to address referral gaps. • Incorporate High Risk Health Coaches and CareNavigators to identify SDOH issues and find resources, coordinate care, and improve outcomes. 	Reduce overall Vizient Vulnerability Index <u>Comparison:</u> 2021: -0.141

Identified as Priority III: “Participants in the Community”

Identified Need:	Description:	Strategies:	Method of Evaluation:
Oral Health	73.3% of Key Informants perceived oral health as a major or moderate problem across the metro area	<ul style="list-style-type: none"> Participate with <u>Nebraska Urban Indian Healthcare Coalition and Fred LeRoy Health & Wellness Center</u> to offer free screenings. 	Decrease the % of key informants reporting Oral Health as a major problem <u>Comparison:</u> 2018: 68%
Potentially Disabling Conditions	24.8% of metro adults report being limited in activities in some way due to a physical, mental or emotional problem	<ul style="list-style-type: none"> Collaborate with the <u>Alzheimer’s Association</u> and <u>memory care providers</u> in the community. Increase preventive care screenings and education. Continue to enhance and improve fall prevention strategies for hospital patients and ensure spaces are safe. 	Decrease the % reporting limited activity <u>Comparison:</u> 2018: 20.2%
Respiratory Diseases	Age-Adjusted Death Rate (per 100,000 population) for Chronic Lung-Related Disease (CLRD) in the Omaha Metro Area is 48.7* <i>*2017 – 2019 data, most recent available</i>	<ul style="list-style-type: none"> Participate with community organizations currently addressing this need. 	Decrease the CLRD Age-Adjusted Death Rate <u>Comparison:</u> National Average: 39.6

Substance Abuse	50.0% of the Key informants perceive substance abuse as a Major Problem in our community.	<ul style="list-style-type: none"> • Enhance the opioid stewardship program throughout the hospital, physician offices, and pharmacies. • Participate with community organizations currently addressing this need (<u>Douglas County Community Mental Health Clinic, and Lutheran Family Services</u>). 	<p>Decrease the % of key informants perceiving that Substance Abuse is a major problem in our community.</p> <p style="text-align: center;"><u>Comparison:</u> 2018: 57.9%</p>
Tobacco Use	14.2% of metro area adults report being a current smoker	<ul style="list-style-type: none"> • Partnership with <u>Metro Omaha Tobacco Action Coalition (MOTAC)</u> to support community-wide education and specifically the dangers of smoking while pregnant. • Provide the <u>No Tobacco Challenge</u> and education campaign to Methodist employees and community members alike. • Offer and promote the <u>Great American Smokeout</u> to employees and community members. 	<p>Reduce % reporting as current smokers</p> <p style="text-align: center;"><u>Comparison:</u> 2018: 11.7%</p>
